

August 7, 2019

Port Authority of The Cayman Islands (PACI) commissioned into service eight (8) new 2020 TICO Pro-Spotter terminal trucks. These trucks are specifically designed for terminal operations consisting of a heavy-duty chassis, high weight capacity axle and 5th wheel. With 95% of the truck being galvanized, composite material cab, all metal dashboard, additional safety lighting and driver comforts & safety features will prolong the life as rust will be minimal. These trucks will provide many years of improved efficiency for port

operations and lower cost of operations for PACI.

The truck replacement is part of the multi-year fleet modernization plan that will continue with additional new machinery in 2019 and beyond to 2023. PACI continues to strive to meet its goals of modernizing its entire fleet, improve operational performance, lower operating costs and provide improved comfort & safety for its staff.

About TICO

TICO Manufacturing is the quality manufacturer of the TICO terminal tractors, which are built "For The Real World" in Ridgeland, S.C. For more information, please visit www.ticotractors.com.
